## WANTED : Trainees to work on Angel / VC fund sourcing

We are a newly incorporated company with the focus on sourcing growth funds for businesses.

We are looking for enthusiastic trainees who are eager to get into the world of VC / Angel Funding. Training scope will cover hands-on analysis of Balance sheets, preparation of business plans, communicating with Angels & VC funds, including data collation and mining.

You will be required to go to client locations, cull out data, interact with management, prepare pitch decks, and where necessary, do a deep dive into the data provided from the viewpoint of due diligence. You will also be required to interact with the clients' bankers to understand the ground realities. Finally, those who are able to put together a case may be directly interacting with Angels & VCs. Therefore good communication skills are preferred, but if you're good at work but have communication challenges, don't worry, you can catch up, we will help you as a trainee should be. You are not expected to be perfect.

We are looking for candidates who are hungry for knowledge in this field and also for the thrill and experience of sourcing and providing funding to businesses. Interest in finance is a must. Educational qualification preferred is CA Inter. Those who have completed articleship and have worked on project reports are also eligible with at least one group in Inter.

You will be paid a very nominal stipend.

This is a short duration work - initially in Chennai, will last a few months. Part-timers will also be considered, provided consistency is maintainable. In case you're required to travel outstation, all expenses will be met of course.

Interested? Mail me at [rajaa@gradedfunding.com](mailto:rajaa@gradedfunding.com). Take time to write a proper, complete covering letter explaining why you are interested and the stipend expected, with the hours that you are willing to allocate plus the total duration that you will be available.
