DEVELOPMENT OF ENTERPRISE AND SERVICE HUBS BILL

The **SEZ Act** will be replaced with a new legislation and will enable the states to become partners in development of enterprise and service hubs.

This will cover all large existing and new industrial enclaves to optimally use available infra and enhance competitiveness of exports.

Govt likely to tweak SEZ rules for better land use

Move will allow use of unutilised spaces in IT/ITeS for non-SEZ purposes

SHREYA NANDI
New Delhi, 26 April

With the fate of the Development Enterprise and Services Hub (DESH) Bill in limbo, the commerce department is working towards tweaking some rules under the existing special economic zone (SEZ) law to allow use of unutilised spaces in IT/ITES for non-SEZ purposes.

The move, when implemented, will free-up the land area that is not in demand through partial de-notification of certain floors or buildings, thereby allowing easier exit.

"The department of commerce is discussing the matter with the revenue department before making changes in the Special Economic Zone Act, 2005," a person aware of the matter told *Business Standard*.

The provision was a part of the draft DESH Bill that proposed denotification of vacant land area even if it is in a contiguous area. This means free spaces in the same building in a "development hub" can be denotified to use them for other purposes. The implementation of a revamped SEZ law via DESH Bill has been delayed due to continued disagreements between the commerce and revenue departments. While the commerce department had finalised the first draft of the Bill in June, it received serious objections from the revenue department over the proposed fiscal incentives.

The initial plan was to table the Bill in the monsoon session, after which the internal target of the commerce department was to get it passed in the winter session. The differences between both departments, however, remained.

This uncertainty regarding implementation of the new law has also made existing and potential investors in SEZs jittery. The new draft DESH Bill seeks to set up "development hubs" for promoting economic activity, generating employment, integrating with global supply and value chains and maintaining manufacturing and export competitiveness, developing infrastructure facilities, promoting investments, including in research and development (R&D).

Such hubs will also include existing SEZs. Another proposal that the government might consider is allowing domestic companies to make payment in rupee for supply of services to domestic tariff areas. The move, if implemented, will boost growth of IT units in SEZs. This has also been a long-pending demand of the industry.

According to government data, goods exports from SEZs during FY23 were at $61.6 billion, with a growth of 15 per cent. Services exports from SEZs grew 27 per cent on year at $101 billion. Overall total SEZ exports grew 22.4 per cent on-year at $163 billion.

AMENDMENTS ON CARDS

- **Finalisation of DESH Bill still uncertain** due to differences between commerce and revenue department
- **The new draft DESH Bill** seeks to set up "development hubs" for promoting economic activity
- **It will free up** the land area that is not in demand
- **Government may consider allowing domestic companies** to make payments in rupee for supply of services to DTAs

CABINET DECISIONS

26 April 2023

Policy for the Medical Devices Sector

- Cabinet approves the Policy for the Medical Devices Sector.
- Six Strategies planned to tap the potential of the Sector, with the Implementation Action Plan.
- Medical Devices Sector is expected to grow from present $11 Bn to $50 Bn in next five years.
- The policy is expected to meet the public health objectives of access, affordability, quality and innovation.

#CabinetDecisions

NATIONAL MEDICAL DEVICES POLICY 2023

Strengthening India's Medical Devices Manufacturing Industry

Six Broad Areas of Policy Interventions to Promote Medical Devices Sector:

- Regulatory Streamlining
- Enabling Infrastructure
- Facilitating R&D and Innovation
- Attracting Investments Through Private Investments, Series of Funding from Venture Capitalists & PPP
- Human Resources Development
- Brand Positioning and Awareness Creation

CABINET DECISIONS
04 JANUARY 2023

NATIONAL GREEN HYDROGEN MISSION

Cabinet approves National Green Hydrogen Mission with initial outlay of **Rs. 19,744 crore**.

Benefits

- Creation of export opportunities for Green Hydrogen and its derivatives
- Decarbonization of industrial, mobility and energy sectors
- Reduction in dependence on imported fossil fuels and feedstock
- Development of indigenous manufacturing capabilities
- Creation of employment opportunities
- Development of cutting-edge technologies

NATIONAL GREEN HYDROGEN MISSION

NODAL MINISTRY

- Ministry of New and Renewable Energy

OBJECTIVE

- Decarbonise energy/industrial/mobility sector
- Develop indigenous manufacturing capacities
- Create export opportunities for GH_2 and its derivative

COMPONENTS OF NGHM

- Strategic Interventions for Green Hydrogen Transition Programme (SIGHT)
- Strategic Hydrogen Innovation Partnership (SHIP) (PPP for R&D)

GH_2 is not commercially viable at present; current cost in India is around ₹350-400/kg. The National Hydrogen Energy Mission aims to bring it down under ₹100/kg.

Expected Outcomes by 2030

- Atleast 5MMT GH_2 annual production
- Rs 1 lakh crore fossil fuel import savings
- 6 lakh jobs
- 50MMT CO_2 annual emissions averted
- ₹ 8 lakh crore investment

HYDROGEN AND GREEN HYDROGEN

Hydrogen is the most common element in nature but exists only in combination with other elements. It has to be extracted from naturally occurring compounds (like water).

Green Hydrogen (GH_2) is made by splitting water through an electrical process called electrolysis, using an electrolyser powered by renewable energy (RE).

Gati Shakti

for holistic
infrastructure
growth: PM

“

While concentrating on modern infrastructure, India needs to work on developing new infrastructure with a holistic approach and integrated approach.

We are set to present to you a PM Gati Shakti's National Master Plan in the near future. This new initiative worth Rs 100 lakh crore will bring employment opportunities to the youth.

A Giant Stride in India's $5 Trillion Economy Goal

Gati Shakti National Master Plan

Multimodal Connectivity Infrastructure to various Economic Zones

Targets upto 2024-25 for Ministry of Road Transport & Highways

- 2 lakh route kms of National Highway network
- Completion of 5,590 km of 4 & 6 lane National Highway along coastal areas
- All State Capitals in North Eastern Region (NER) to be connected with either 4-lane National Highway or 2 alternate alignments of 2-lane configurations each

A Giant Stride in India's $5 Trillion Economy Goal

Gati Shakti National Master Plan

Multimodal Connectivity Infrastructure to various Economic Zones

Targets upto 2024-25 for Ministry of Shipping

- Increase in Cargo capacity at the Ports to 1,759 MMTPA from 1,282 MMTPA in 2020
- Cargo movement on all National Waterways will be 95 million MT from 74 million MT in 2020
- Cargo movement on Ganga to be increased from 9 to 29 million MT

A Giant Stride in India's $5 Trillion Economy Goal

Gati Shakti National Master Plan

Multimodal Connectivity Infrastructure to various Economic Zones

Targets upto 2024-25 for Ministry of Power

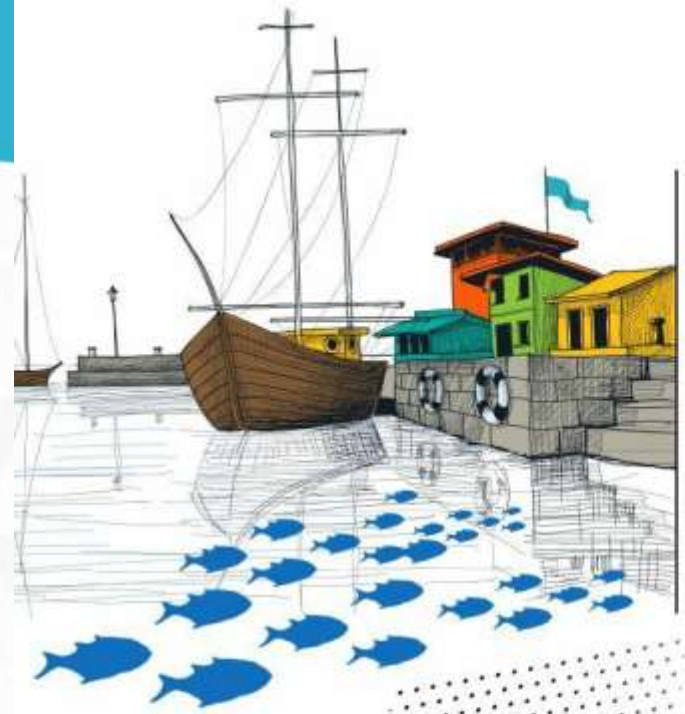

- Transmission Network from 4,25,500 circuit kms to 4,54,200 circuit km
- Transformation capacity 12,03,000 MVA
- Transmission network performance parameters to match the best global standards

National Vehicle Scrappage Policy 2021 Launch by PM Narendra Modi

National Vehicle Scrappage Policy 2021

HOW PROCESS WILL UNFOLD

A vehicle older than 20 years, if found unfit or registration certificate is not renewed, will be de-registered

Registered owners to hand over such vehicles to a Registered Vehicle Scrapping Facility with certificate of the vehicles' registration, their PAN details, and other documents

Scrapper to verify records of the vehicles from database of the stolen vehicles and issue a Certificate of Deposit, mandatory for the owner to avail incentives

The certificate once used will be stamped "Cancelled" by the agency

Government will maintain a database of the vehicles scrapped every year

INCENTIVES FOR VEHICLE OWNERS

Scrap value: 4-6% of ex-showroom price of new vehicle to be given to the owner by the scrapping centre

Tax rebate: States may be advised to offer a road tax rebate of up to 25% for personal vehicles and up to 15% for commercial vehicles against

Discount on new vehicle: Vehicle manufacturers will be advised to give 5% discount on new vehicles against a scrapping certificate

Fee waiver: Registration fees may also be waived for purchase of new vehicle against the scrapping certificate

India's Proposed Scrappage Policy

WHEN WILL THE VEHICLES BE DEREGISTERED?

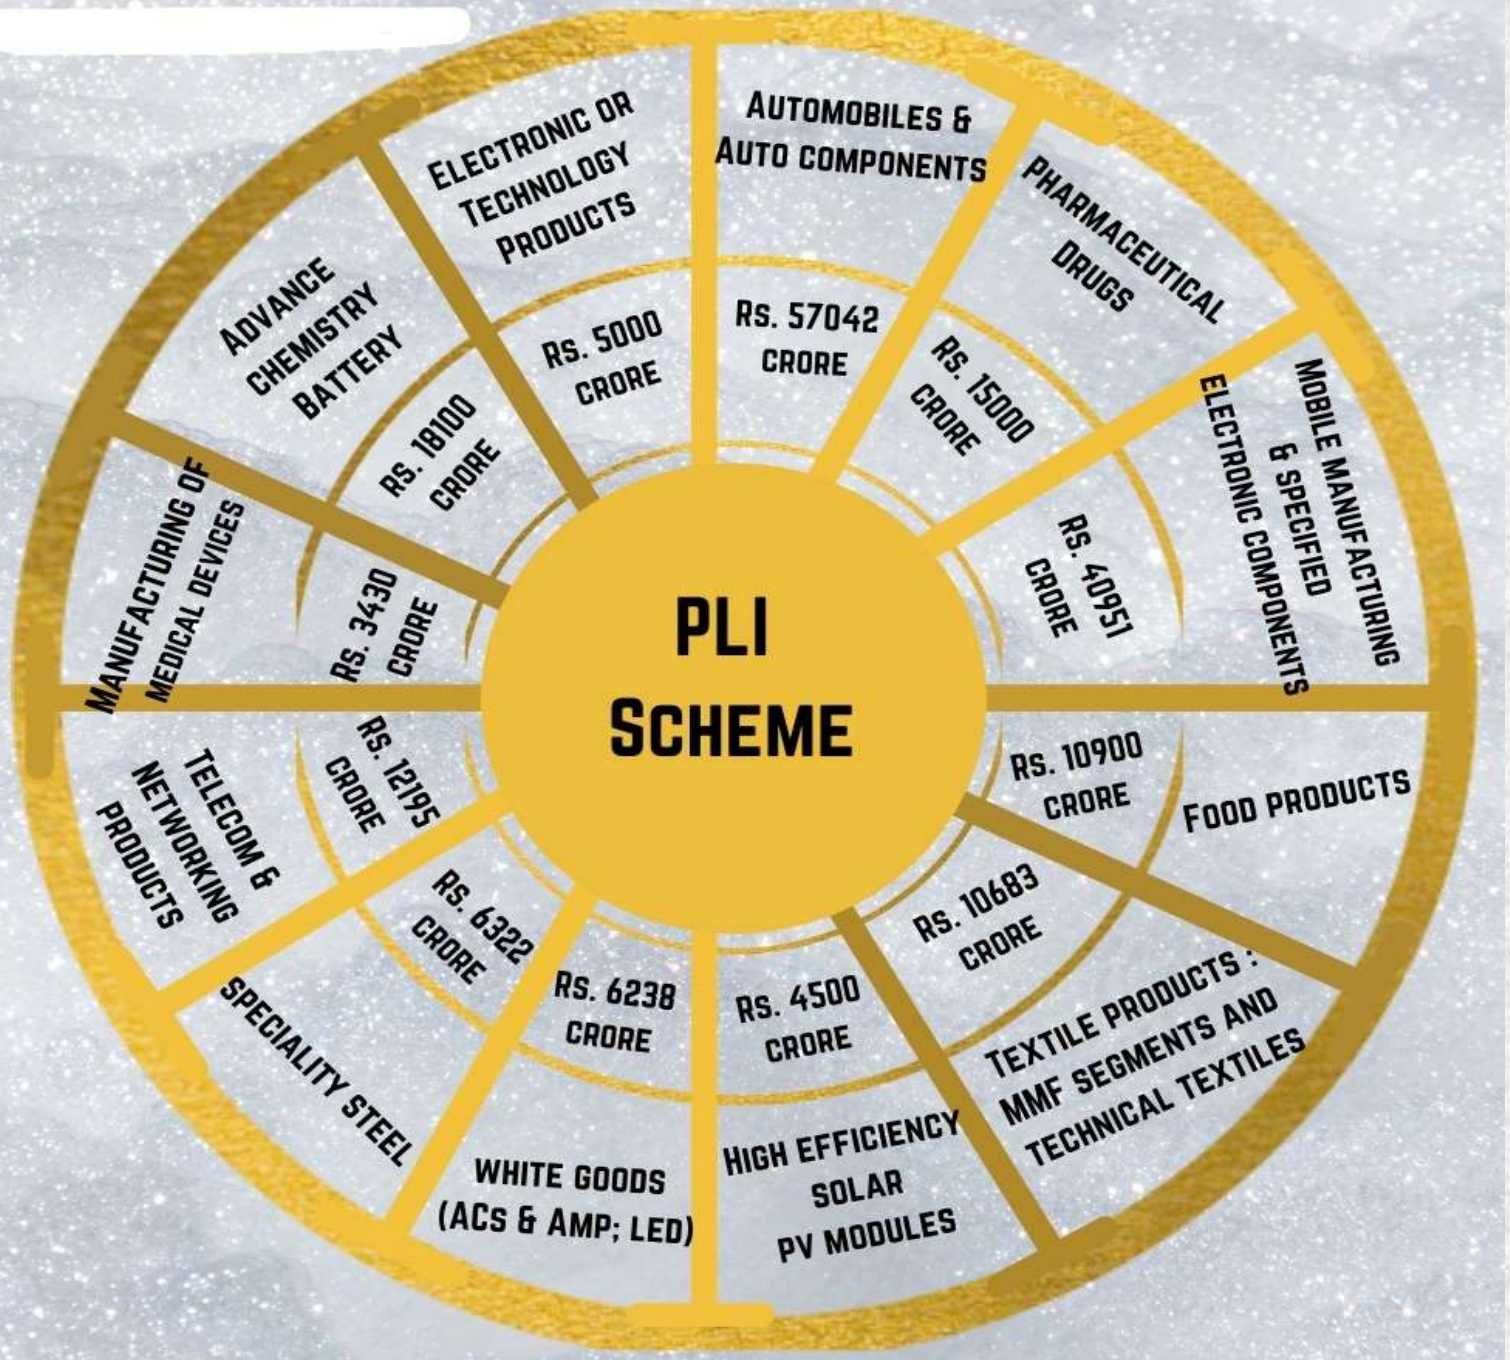

Commercial vehicles in 15 years

Private vehicles in 20 years

PLI beneficiaries got ₹2,874 cr until March

Empowered group of secys, NITI Aayog review some sectors to bring them to 'acceptable levels'

TAKING STOCK

Claims & disbursements under PLI schemes as of March 31, 2023

Sector	Actual PLI claims (in ₹ cr)	Amount disbursed (in ₹ cr)
Large-scale electronics manufacturing	1,651	1,649
Electronic/tech product	71	5
Bulk drug	5	4
Medical device	16	13
Pharmaceutical	899	652
Telecom & networking product	36	35
Food product	700	486
Drone and drone component	41	30

Note: Figures rounded off

Source: DPIIT

SHREYA NANDI
New Delhi, 26 April

Claims under the production-linked incentive (PLI) scheme stood at ₹3,420 crore in 2022-23 (FY23), of which the government paid incentives of ₹2,874 crore to PLI beneficiaries until March across eight sectors — mobile manufacturing, information technology hardware, pharmaceutical (pharma), bulk drug, medical device, telecommunications (telecom), food processing, and drone.

This translates into 1.4 per cent of the ₹1.97 trillion that has been allocated for five years towards the scheme. The incentive payout is set to peak over the next two to three years, which will be crucial, Additional Secretary in the Department for Promotion of Industry and Internal Trade Rajeev Singh Thakur said on Wednesday.

Thakur said that pending claims of ₹574 crore are yet to be disbursed and claims are at different stages of approval.

Depending on the departments and the nature of the scheme, it takes one to two months to get a company's incentive claims approved.

The government had rolled out three PLI schemes in 2020-21 (FY21) and 11 more for the sunrise sectors, such as drone, specialty steel, textile, and food processing, among others, in 2021-22 (FY22), with an overall allocation of ₹1.97 trillion for five years. The first set of incentive disbursements started in FY23.

The govt had rolled out 3 PLI schemes in FY21 and 11 more for sunrise sectors

"The idea was to give manufacturing (through this scheme) a boost and make the (local) industry more competitive. The idea was also to get cutting-edge technology (tech) and enable the transfer of tech, which is happening in pharma. It is giving Make in India a leg-up. Big companies have started shifting base to India... The schemes will go on until 2028-29. Not all schemes are moving at a similar pace. Some schemes are performing better than others," said Thakur.

| INTRODUCTION

Technical textiles is the emerging area for investment in India. The potential of technical textile in India is still untapped. Technical textiles represents a multi-disciplinary field with numerous end use applications. The production of different items of technical textile industry has been slowly but steadily increasing in the country. However there is lack of information regarding the status of the technical textile industry . The awareness on technical textiles among prospective entrepreneurs and consumers is very less. Hence entrepreneurs require details like market size , domestic and global scenario of technical textiles, details of govt schemes, list of existing technical textile manufacturers, importers and exporters , details of technical textile machinery manufacturers, etc. There is a need for an exclusive website for technical textiles.

This website endeavours to provide all the above information at one place.. This website apart from providing above details will also link all the stake holders at one place and also provide link to all Centres of Excellence of technical textiles and will be one stop shop for accessing

NEW Scheme for Promoting Usage of Geotechnical textiles in North Eastern Region

What are Technical Textiles?

वस्त्र मंत्रालय
MINISTRY OF
TEXTILES

What are Technical Textiles?

Technical textiles are defined as high-performance textile products, materials, and fibres that are used for their functional use rather than for aesthetic purposes.

Technical textiles have varied applications in several vital industries including aerospace, packaging, hazard protection, shipping, sports, agriculture, defence, healthcare, construction, etc.

The usage of technical textiles has the benefit of large-scale improvements in performance, efficiency, conservation of resources, cost reduction, environmental protection and cost effectiveness.

Other terms used for defining Technical textiles include industrial textiles, functional textiles, performance textiles, engineering textiles, invisible textiles and hi-tech textiles.

Application Areas of Technical Textiles

Agrotech Bird protection nets, finishing nets, crop covers, mulch mats, shade nets

Buildtech Floor & wall coverings, scaffolding nets, awnings & canopies

Clothtech Interlinings, labels, elastic narrow fabrics, shoelaces

Why Technical Textiles is the future of Textiles?

वस्त्र मंत्रालय
MINISTRY OF TEXTILES

World is shifting from Natural fabrics to MMF

Degree of Freedom to engineer a product is extensively high

High-growth potential in Specialized fibres such as Glass fibre, Carbon Fibre, & Metallic Fibres

Potential for quick adoption in applications & becoming a manufacturing hub

Specialized workforce generating capacity

Potential to drive India's overall exports

Drive Innovation and Research & Development at a robust pace

Attract high quality FDI in niche and thrust areas

Mega Investment Textiles Parks (MITRA)

Seven PM MITRA (Pradhan Mantri Mega Integrated Textile Region and Apparel) Park sites announced

PM MITRA Parks to come up in Tamil Nadu, Telangana, Gujarat, Karnataka, Madhya Pradesh, Uttar Pradesh Maharashtra

PM MITRA Parks inspired by the 5F vision of Hon’ble Prime Minister - Farm to Fibre to Factory to Fashion to Foreign

Nearly Rs. 70,000 crores investment and 20 lakhs employment generation envisaged

Parks will offer an opportunity to create an integrated textiles value chain right from spinning, weaving, processing/dyeing and printing to garment manufacturing at a single location

World-class industrial infrastructure would attract cutting edge technology and boost FDI and local investment in the sector

Integrated Textile Value chain at one location in each park will reduce logistics cost of Industry

Centre and States to form SPVs in JV mode for setting up PM MITRA Parks

PM MITRA Park sites approved by Government of India

Posted On: 17 MAR 2023 5:21PM by PIB Delhi

The Government of India today announced the sites for setting up of 7 PM Mega Integrated Textile Regions and Apparel (PM MITRA) Parks for the Textile industry. The Parks will come up in **Tamil Nadu, Telangana, Gujarat, Karnataka, Madhya Pradesh, Uttar Pradesh and Maharashtra.**

Inspired by the 5F vision of the Hon'ble Prime Minister (i.e. Farm to Fibre to Factory to Fashion to Foreign), the PM MITRA Parks are a major step forward in realising the Government's vision of making India a global hub for textile manufacturing and exports. It is expected that these parks will enhance the competitiveness of the textiles industry by helping it achieve economies of scale as well as attract global players to manufacture in India.

About Us

TSIIC (Telangana State Industrial Infrastructure Corporation) also known as TSIIC is a Telangana State Government initiative for providing infrastructure through development of industrial areas. TSIIC was established in the year 2014 for identifying and developing potential growth centers in the Telangana State fully equipped with developed plots/sheds, roads, drainage, water, power and other infrastructural facilities; providing social infrastructure, like housing for workers near industrial zones, co-coordinating with the agencies concerned for providing communication, transport and other facilities. The Corporation also has active projects in the Public-Private Partnership Mode.

Ease of Doing Business

One of the
Best Performing States

★★★★★

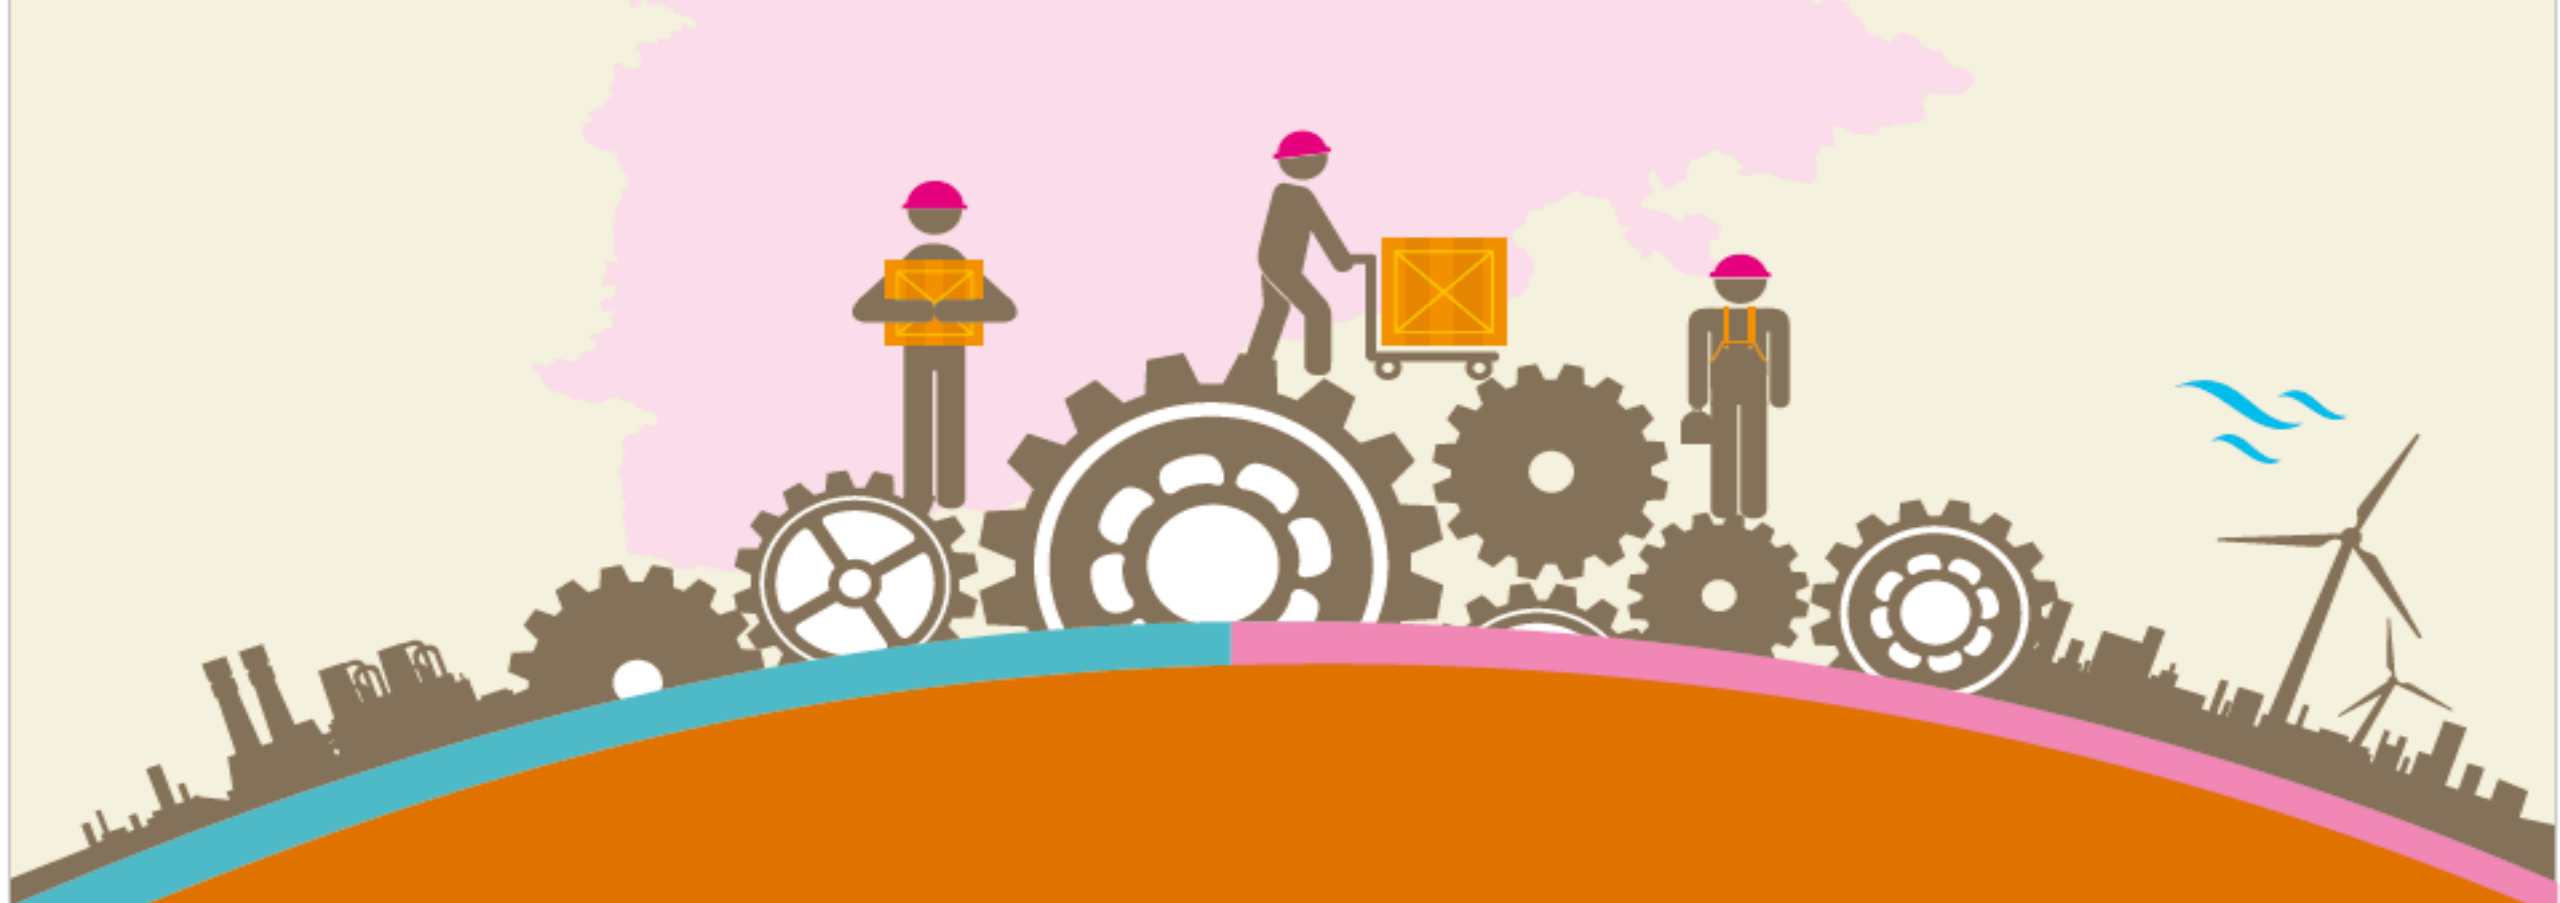

Welcome to Telangana.
The best state to do business in India.

The vision for industrialization of Telangana is "Research to Innovation; Innovation to Industry; Industry to Prosperity". The industrial policy framework will be driven by the slogan of "In Telangana—Innovate, Incubate, Incorporate". The policy framework intends to provide a business regulatory environment where doing business would be as easy as shaking hands. Innovation and technology will drive the industries of the Telangana State.

MEET OR BEAT POLICY

There is a provision for tailor-made Incentives for Mega Project (Investment above 30 Million USD or creating over 1000 Jobs) or for a project of strategic importance. It should be mentioned here that for 'Strategic and Mega Projects', the Government of Telangana observes a strict "meet or beat" policy, wherein we will be happy to tailor incentives to match or better incentives offered by any other State Government within the Country.

INDUSTRIAL POLICY FRAMEWORK FOR THE **STATE OF TELANGANA**

TELANGANA

LOGISTICS

Know About Sector

8th

Ranking in LEADS

150 acres

Four major logistics projects are in development

0.4 Mn

Warehousing absorption doubled to in Sq.ft

Aparna Bhumi

Director,
Logistics

The purpose of the new logistic policy is to attract more investment to the state and employment opportunities. The logistics sector in India has been growing at $215 billion per annum with an impetus from e-commerce penetration and government initiatives like make in India and 100 per cent FDA in warehouses, food storage facilities, etc.

SPECIAL ASSISTANCE TO WOMEN ENTREPRENEURS

Like SC/ST entrepreneurs, the number of existing women-owned industrial enterprises is meagre. The Telangana State Government encourages women entrepreneurs in a big way. Each of the 9 districts of the state (excluding Hyderabad) will have one or more industrial parks exclusively for women. Organizations working for women entrepreneurs like COWE, ALEAP and FICCI-FLO are invited to partner with the government to identify and train women entrepreneurs, get their project proposals developed, link them to financial institutions and handhold and monitor the progress of their projects. Among women, the government would facilitate a higher number of entrepreneurs to emerge from socially deprived categories like SCs, STs, BCs and Minorities.

TRADITIONAL ARTS AND HANDICRAFTS

The State of Telangana has a number of internationally recognized forms of traditional arts and handicrafts. These are handicrafts like Nirmal Paintings, Dokra metal work, Bidri ware, Pembarthy Brass ware as well as textiles like Pochampally Ikat, Gadwal saris and Warangal carpets. Many artisans and craft-personnel today continue to live on the production of these arts and handicrafts, but there income levels are declining. To improve the productivity and incomes in this sector, the Government of Telangana intends to take a number of actions, including:

MARKETING BRAND TELANGANA

Telangana is the 29th and newest State of the Union of India. There is a need to create awareness about the State of Telangana and its brand image. To this end, Telangana State will participate extensively in a large number of national and international trade fairs, conferences and exhibitions so that the strengths and opportunities of the State can be showcased. The industrial policy of Telangana State has also to be publicised widely.

In addition to promoting the brand image of the State, it is also essential to promote the SMEs of the state. The State will actively promote the participation of Telangana SMEs in trade fairs, expositions, buyer seller meets and other such events. The State will also leverage all funds available from Government of India schemes under the MSME, Commerce, Textiles, and Pharmaceutical Departments and sector specific Export Promotion Councils to promote State SMEs. Adequate budget support is being provided for marketing the State and the industrial and craft products of the State.

INDUSTRIAL LAND BANK

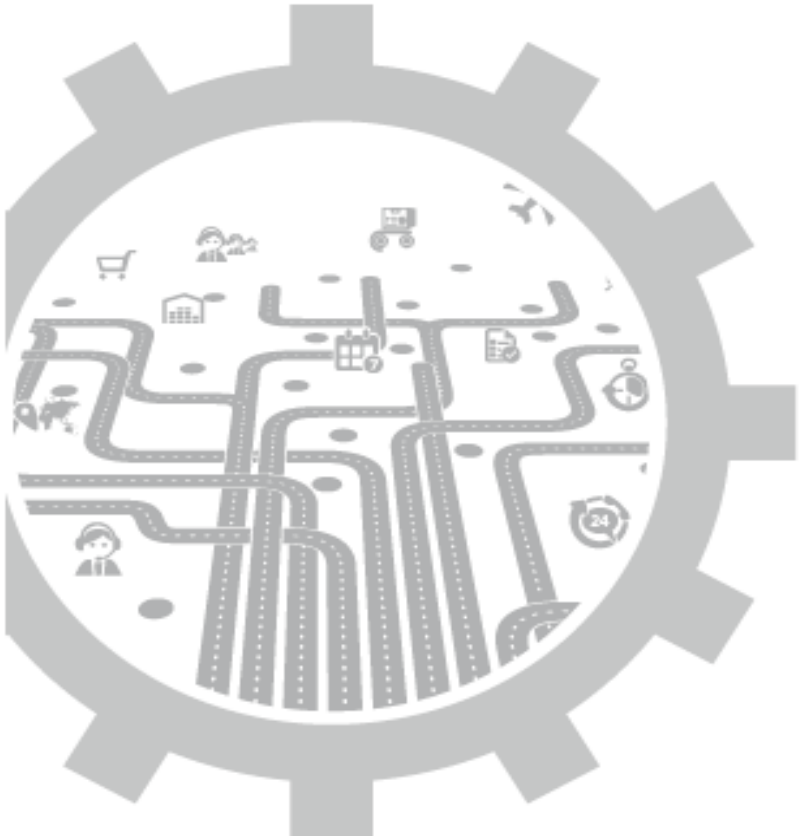

An extent of 150,000 acres of Government land has been transferred and is now vested with Telangana State Industrial Investment Corporation (TSIIC). This land is ready to be occupied for industrial purposes. This transferring of land to TSIIC will help save crucial time for industries and is an investment friendly initiative. In addition, TSIIC also has 150 ready to occupy Industrial Parks. Some of the industrial parks will also permit multi-sectoral activities and general manufacturing units.

INFRASTRUCTURE DEVELOPMENT

The development of industrial and related infrastructure will be the responsibility of the Telangana State Industrial Infrastructure Corporation (TSIIC). The financial base of the TSIIC will be strengthened and it will be made to function as an effective organization. An extent of 150,000 acres in the State identified as fit for industrial use has been transferred to the TSIIC. This land asset base will be leveraged to raise finances from the market so that the TSIIC can become independent of Government over a period of time as far as budgetary support is concerned.

The TSIIC will develop all required infrastructure for the sector specific parks like approach roads, water supply, industrial power, and common effluent treatment facilities. TSIIC will raise market loans with Government guarantee and also get initial minimal budgetary support for the creation of the infrastructure in these new industrial parks. It will be ensured that at the time of allotment to industries, all infrastructural facilities are available in the industrial park, and the investor can begin the construction of his unit right from the first day.

CONNECTIVITY

Approach roads of suitable dimensions, in accord with the nature of industrial activity likely to happen within the park, will be developed to provide connectivity to the nearest national/state highway, railway station and airport. Based on requirement, provision of a railway siding will also be considered.

SKILL DEVELOPMENT

While encouraging industrial investments is a priority, the Telangana State Government also realizes that an important responsibility rests on its shoulders, which is to make trained and skilled manpower available for the industry's requirements. The Telangana State Government will accordingly take up appropriate skill development programmes so that technically qualified youth can find employment in the industry. These skill development programmes have to be industry sector specific and the training package has to be developed in consultation with the industry so that the trained candidates meet industry requirements. The Telangana State Government will take support of accredited Private Sector skill providers in this endeavour. Mega industries will also be especially encouraged to start their own skill development centres within the same industrial park where their unit is located. The Industrial Area Societies will also be encouraged to participate in design and implementing skill development programs.

Skill development programmes would aim to train the youth in getting entry-level jobs, and also upgradation of skills of the existing employees. The skill development programmes targeted at industrial sector jobs will be supported by the government under the ambit of the Telangana State's Skill Development Mission in general and the Telangana State Accelerated SSI Skills Training (T-ASSIST) program of the Industries and Commerce Department.

INDUSTRIAL TOWNSHIPS

As part of the master plan for the sector specific industrial parks to be developed by TSIIC, provision for mini-industrial townships will be made. The townships will contain executive housing, workers housing, social infrastructure and other amenities. This township development can be initiated by the TSIIC in partnership with established industry groups who have the competence in this field and also other reputed real estate companies. Further, in the vicinity of industrial parks, land segments will be zoned as Residential, to enable the private sector to develop housing for the industrial employees. Separate norms and incentives for the township development will be released as a part of the State's urban development policy.

INDUSTRIAL INCENTIVES

The Telangana State Government is committed to encourage the process of industrialization by making various kinds of incentives available to entrepreneurs.

The Telangana State Government also assures an entrepreneur-friendly and graft-free regime of disbursing the incentives.

The Telangana State Government guarantees that the incentives will be released on time, and direct to the respective bank accounts.

There will be a transparent online application system; the process will involve minimal human interaction.
There are enhanced incentive packages available for Scheduled Castes, Scheduled Tribes, physically handicapped, and women entrepreneurs.

Mega Projects with an investment of over Rs.200 crores in plant and machinery or employment above 1000 persons will receive tailor-made incentives in addition to standard large category industry incentives.

The Telangana State Government has considered providing incentives to the entrepreneurs in the following areas under its T-IDEA (Telangana State Industrial Development and Entrepreneur Advancement) incentive scheme:

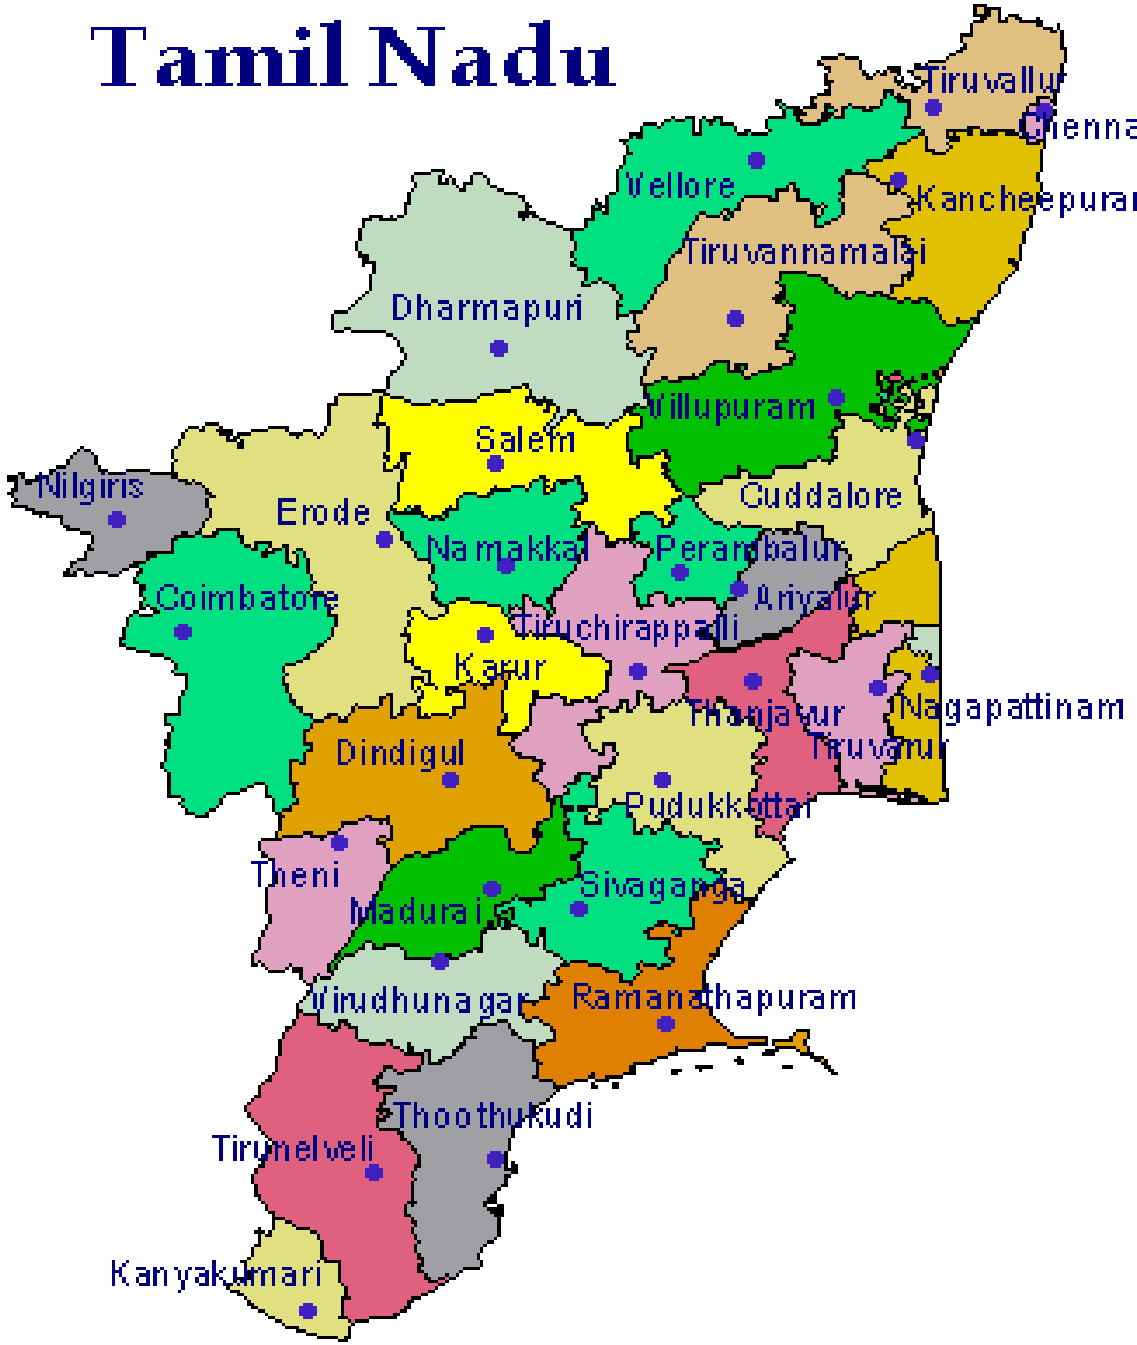

- Stamp duty reimbursement
- Land cost rebate
- Land conversion cost
- Power cost reimbursement
- Investment subsidy
- VAT reimbursement
- Interest subsidy
- Seed capital for 1st generation entrepreneur
- Training and skill development cost reimbursement
- Quality/patent support
- Clean production measures
- Reimbursement of infrastructure development costs

Details of general and sector-specific incentives wil
issued through Government Orders from time to ti
and publicized on the website and through ot
means. While providing incentives to upcom
industries, the Government will also ensure that
existing industries are also benefitted.

LIFE SCIENCES -
Pharmaceuticals, Biotechnology and Medical Devices

Telangana holds a dominant position in the Life Sciences sector and has emerged as the Pharma Capital of the country, contributing to about 1/3rd of the pharmaceutical production. The State is home to India's largest and first systematically planned Life Sciences Cluster – the Genome Valley, which now houses over 200 life sciences units, and contributes to about one third of the global vaccine production. It is estimated that about one third of the US FDA approved facilities and 1/10th of the medicines exported to USA are from Telangana.
